Allowable Subject Matter

1. Claims 1-6 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner does not agree with applicant that McBride et al. does not disclose a DC power supply, however, the examiner does agree with applicant that it would not have been obvious to substitute the interdigitated electrodes of Becker et al. or Bakewell et al. for the series of individual electrodes of McBride et al.

For the embodiment shown in Figure 5 McBride et al. discloses that the electrodes **201** may be used for traditional electrophoresis (col. 4, ll. 57-62). One with ordinary skill in the art at the time of the invention would have understood "traditional electrophoresis" to mean electrophoresis using a DC electric field and thus a DC power source. Thus, McBride et al. discloses a DC power source within the four corners of the patent. The discussion of Figure 4 discloses that electrodes **16A** and **16B**, which provide all or substantial part of the field that moves the molecules, are to be used for electrophoresis and implies these *two end electrodes* are electrically separate from the internal electrodes **1** (col. 3, ll. 47-55). Upon viewing Figure 4 and reading the associated description one with ordinary skill in the art would have understood that electrodes **1** are at least intended for traditional electrophoresis; that is, electrophoresis using a DC power source.

Where the examiner agrees with applicant, though, is that by substituting the interdigitated electrodes of Becker et al. or Bakewell et al. for the series of individual electrodes

of McBride et al. the device of McBride et al. would not be able to function as intended. As applicant has pointed out, a traveling wave field as taught by McBride et al. could not be created with interdigitated electrodes having projecting legs. Also, McBride et al. use the series of individual electrodes for affecting the relative movement of molecules, while Becker et al. or Bakewell et al. use their electrodes to trap molecules or cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
